

# Strap Hinge Installation Instructions

## PARTS LIST

No.	Qty.	Description
1	1	Black Strap Hinge
2	4	Optional Black Push Pin

**NOTE:** This installation can be performed on sawhorses or once the door is installed.

**Step 1:** Locate strap hinge in desired location between the section joint and the upper end of the emboss.

**Step 2:** Using the strap hinge as a template, drill through one of the holes using a 5/32" drill bit.

**Step 3:** Firmly push one push rivet through the strap hinge and the hole drilled in step 2.

**Step 4:** Again, using the strap hinge as a template, drill the other 2 holes in the section and firmly push one rivet in each hole in the strap hinge and section.

**NOTE:** All holes must be drilled from the outside through the door and insulation, if applicable, with a sharp drill bit to ensure a clean cut. Use care to prevent damaging the door. An extra push rivet is supplied in case one is damaged during installation.
