

Gary Sullivan Intro and Tags

INTRO

Hi. I'm Gary Sullivan host of At Home with Gary Sullivan, America's most listened to national home improvement radio talk show.

A new garage door or entry door system is an important investment in the beauty, energy efficiency and value of your home. A lot of factors go into choosing the right door including cost, design, construction material and insulation. You've come to the right place to begin your search.

Clopay offers the widest variety of designs and material options to fit your home style and your budget. And they have some really helpful tools to help make the process easier like the Door Imagination System. Just upload a digital photo of your home to try on various door styles until you find the perfect one. Then, click on Clopay's dealer locator to find a professional distributor in your area to install it.

Have questions while you're browsing? Look for my videos throughout the website to help you understand the features and benefits of Clopay garage doors and entry doors, or use Clopay's live chat tool to connect instantly with a customer service representative.

As a home improvement expert I can tell you from experience that choosing the right door begins with choosing the right company. Clopay is the leading manufacturer of residential garage doors in North America and has been in the curb appeal business for nearly 50 years. It is the only company that offers a complete line of entry door systems to complement its most popular garage door styles, and it's the only garage door brand backed by the Good Housekeeping Seal. All Clopay products are made right here in the USA.

It's time to explore your Clopay door options. I'm Gary Sullivan. Thanks for visiting.

ENTRY DOOR TAG

Did you know that Clopay offers beautiful fiberglass entry door systems to complement its most popular garage door styles, including the one shown here? Visit the entry door section of the Clopay web site to find out how you can maximize your home's curb appeal with a coordinating Clopay entry door system.

GARAGE DOOR TAG

Maximize your home's curb appeal with a Clopay garage door uniquely designed to complement your new entry door system. Go to the residential garage door section of the Clopay website to explore the beautiful design, color and window options available.

Avante Collection Script

Talk about a garage door that turns heads, this is it. In fact you may have seen this striking door featured in projects on ABC's Extreme Makeover: Home Edition, the DIY Network and HGTV.

Clopay's Avante Collection combines contemporary aluminum and glass in a sleek modern design.

But this delicate looking door is very durable. It's built using a 2-1/8" thick, rust-proof commercial grade aluminum frame with integral reinforcing fins. It is shown here with a black anodized aluminum frame and insulated, tempered frosted glass panels, which allow natural light to filter through while maintaining relative privacy. Many other glass and aluminum panel options and frame colors are available.

Use of the Avante isn't limited to garage door applications. It can also be used as an indoor partition or a patio door. At the press of a button, the doors are automatically raised, allowing traffic to flow during gatherings.

Be sure to review the images in our online image gallery for additional inspiration.

Canyon Ridge Collection Script

Love the look of wood but not the upkeep?

Clopay's Canyon Ridge Collection delivers the best of both worlds: the realism and design flexibility of wood with the low-maintenance, energy-efficient benefits of an insulated steel garage door. But unlike real wood, The Canyon Ridge won't rot, shrink, separate, or crack.

Clopay's Canyon Ridge garage door is constructed from a durable, composite polymer material molded from actual wood species to duplicate the natural texture and grain patterns that give wood doors so much character. And *like real wood* – the surface can be painted or stained.

The 1/2" thick material is attached to a three-layer polyurethane insulated steel door for superior strength and energy efficiency, delivering an impressive 19.2 R-value for year-round comfort in any climate.

As you can see these faux wood beauties are almost indistinguishable from the real thing. This is Canyon Ridge Design 11 with Mahogany cladding and overlays, a rectangular window and Tuscan door handles finished in a Dark stain.

Clopay offers so many designs, decorative window and hardware options that you're sure to find the perfect combination for your home. Choose from Clear Cypress, Pecky Cypress or Mahogany for the base cladding and overlays, or mix and match species for a one-of-a-kind look.

The doors arrive at your home factory finished and ready to install in either a Medium or Dark stain. A painted white finish is also offered if you're going for a rustic,

wainscoted look. Clopay can also pre-prime the doors for a custom finish application in the field.

INSERT TAG: Did you know that Clopay offers beautiful fiberglass entry door systems to complement its most popular garage door styles, including the one shown here? Visit the entry door section of the Clopay web site to find out how you can maximize your home's curb appeal with a coordinating Clopay entry door system.

Coachman Collection Script

If you like the high-end look of a wood carriage-house style door but still want the benefits of a low-maintenance, insulated steel door, Clopay's Coachman Collection is the perfect blend of beauty and practicality.

These doors look like wood on the outside, but are actually crafted of multiple layers of steel and insulation topped with a 5/8" composite overlay to create the carriage house design.

Accented with wrought iron hardware, and a decorative center groove, Coachman doors have the charming appearance of a swing-out door, but they operate with the convenience of an automatic overhead opener.

The 1- 3/8" or 2" thick insulation with a thermal break helps combat energy costs and keep rooms above or next to the garage warmer in the winter and cooler during the summer.

Steel carriage house doors are a popular alternative to wood models because they won't rot, warp or crack and are a good choice if you do not want a stained door.

The colors, designs and window options make the Coachman Collection a great fit for many home styles including Craftsman, Victorian, English Tudor, a coastal cottage or even traditional designs. The door shown here is Design 21 in a sandtone base color with white overlays and an arch window.

Check out the detailing and craftsmanship on this door... the stylish beveled edge, clip on grilles you can remove from the windows for easy cleaning... and you can see how the overlays extend across the entire window section for a custom crafted look.

Coachman Collection doors are available with Clopay's built-in WindCode® reinforcement system for homes located in coastal regions.

Review the Coachman Collection image gallery to see the variety of looks you can create to complement your home.

Gallery Ultra-Grain Script

Clopay has a distinctive and affordable “stained wood look” option for homeowners in the market for a high quality insulated steel garage door. It’s called Ultra-Grain, and unlike real wood, it won’t rot, shrink, separate, or crack.

Ultra-Grain’s painted steel surface simulates a stained wood door without the maintenance requirements of real wood. The grain runs in two directions, both horizontally and vertically, following the stiles and rails. This detailing, along with the stucco surface texture on the door, gives it a natural looking appearance.

No special maintenance is required to preserve the finish, beyond standard garage door manufacturer recommendations to wash and rinse the surface periodically.

Three stain options are available to complement your home: Medium and Dark Oak, and the Walnut finish shown here with Clopay’s Trenton decorative windows. Many clear and decorative glass styles are offered or you can choose a door without windows.

These doors feature a three-layer sandwich construction and are polyurethane insulated for superior energy efficiency. The R-values range from 6.5 to 17.2 depending on the thickness and insulation type. Insulated glass is also an option.

If you are going for a low-maintenance insulated stained wood look on your garage door you probably want the same for your front door....

Gallery Collection Script

Clopay's Gallery Collection vintage style steel garage door is just as versatile as it is affordable. The Gallery is comparable to a traditional raised panel door but details like the grooved panel design give it carriage house charm that will set your home apart from the rest. Choose from either a long or short grooved panel style and a variety of decorative windows to create a one-of-a-kind look. This is a new window design called the Clayton.

Decorative black spade handles give it the appearance of an authentic, old-fashioned swing-out door, although it operates like a traditional overhead garage door with an automatic opener. The Gallery comes factory-finished in several colors including a warm Desert Tan, which is the color shown here, as well as Clopay's exclusive Ultra-grain stained woodgrain paint finish.

It's also offered with a range of insulation options to fit your energy efficiency requirements including R values up to 17.2. Insulated windows will maximize the comfort and utility cost savings.

If you live in a coastal region, the Gallery is available with Clopay's built-in WINDCODE® reinforcement system.

Custom Reserve Collection Script

Give your home the distinction of a “custom design statement” with Clopay’s Reserve Collection wood carriage house door line.

Hand built by craftsmen using premium woods harvested from sustainable and naturally fallen forestry, Clopay can custom build any door you can imagine, using the species of your choice. Or you can choose from up to eight historically accurate carriage house designs offered in the Semi-Custom or Limited Edition series.

This custom designed Meranti door looks like it should swing open but it actually operates with the convenience of an automatic overhead opener. The addition of decorative seeded window glass and wrought iron hardware enhance the historic charm.

A real benefit to Clopay’s custom wood door line is the added layer of polystyrene insulation built into the door. The four- or five-layer door is almost three inches thick.

Proper finishing is critical to the longevity of a wood door and Clopay uses a multi-step process to achieve a furniture quality finish worthy of the most discriminating close-ups.

Doors and windows are sanded, caulked and finished on all six sides under controlled conditions, using Sikkens Cetol wood finish and stain, which is the highest quality and most durable exterior stain finish system available. Your door arrives ready to install eliminating any delays or concerns about contractors in the field.

Browse the Reserve Collection image gallery for more wood door inspiration.

Premium 9130 Script

Don't overlook the garage when it comes to improving the energy efficiency of your home. After all, it is the largest opening on your house and probably one of the most frequently used entrances.

Since attached garages typically share one or two common walls with the house, any hot or cold air that travels through the door will ultimately affect the living areas next to and above the garage.

A Clopay Premium Series polyurethane insulated garage door helps reduce energy loss and improve the comfort of your home year round.

This is Clopay's Model 9130 featuring the Elegant panel design. It's shown in Desert tan, a very popular color, with wrought iron decorative windows. What a design statement this door makes!

The door features a three-layer sandwich construction, which means it has a layer of polyurethane insulation foam injected between two galvanized steel skins, with a thermal break to deliver R-values up to 17.2. Insulated windows are also an option for greater energy efficiency.

Besides improving comfort, the multi-layer construction helps reduce noise and adds strength to the door.

Clopay offers several colors and decorative window options to customize the look of your door. Review the Premium Series image gallery to see the variety of looks you can create to complement your home.

Mahogany Arbor Grove Entry Door Script

Clopay is the only garage door manufacturer that offers a full line of beautiful fiberglass entry door systems to complement its popular garage door styles.

This Mahogany woodgrain entry door with Prescott wrought iron decorative glass from Clopay's Arbor Grove Collection has the texture and graining of a real wood door. The door is factory finished in a Cherry stain. A Florence handleset in a Patina finish completes the look.

Oak and Cherry grain fiberglass are also offered in this series.

Fiberglass entry doors are a beautiful alternative to custom wood doors that typically don't hold up to the damaging effects of weather. Unlike wood, fiberglass is low-maintenance and impervious to moisture, so it won't peel, shrink, rot, warp or crack.

The polyurethane foam core provides five to six times the insulation value of a wood door, which can lower heating and cooling costs and improve the comfort of your home year round.

The beauty of a Clopay fiberglass entry door system isn't only skin deep. The doors feature low-maintenance composite jambs, mull posts and brickmould. Heavy duty ball-bearing hinges are put on every door to guarantee its durability, longevity, operation and appearance.

Clopay's superior quality Q-lon weatherstrip provides a tight exterior seal that will last for years. A rot-resistant sill with a composite adjustable threshold fits snugly to the door bottom to protect against water and air infiltration.

Clopay fiberglass entry doors are Energy Star rated, NFRC certified, and also qualify for the Energy Tax Credit if you purchase and install by December 31 of this year.

INSERT TAG – Maximize your home’s curb appeal with a Clopay garage door uniquely designed to complement your new entry door system. Go to the residential garage door section of the Clopay website to explore the beautiful design, color and window options available.

Craftsman Collection Entry Door Script

Clopay is the only garage door manufacturer that offers a full line of beautiful fiberglass entry door systems to complement its popular garage door styles.

With its authentic straight fir grain and charming architectural details like the optional dentil shelf and two panel embossment, Clopay's Craftsman Collection fiberglass entry door system is the perfect complement to bungalow, Mission and transitional style homes.

Clopay offers three glass options to customize your Craftsman Collection entry door: Cimarron™ decorative glass, Clarion™ clear glass or Clarion clear glass with Simulated Divided Lite Grilles, shown here. All of Clopay's clear glass is Low E for added energy efficiency. This door is factory-finished in a Walnut stain and features an Addison handleset.

Fiberglass is low-maintenance and impervious to moisture, so it won't peel, shrink, rot, warp or crack like wood. The polyurethane foam core provides five to six times the insulating value of a wood door, which translates into lower heating and cooling costs for you.

The beauty of a Clopay fiberglass entry door system isn't only skin deep. The doors feature low-maintenance composite jambs, mull posts and brickmould. Heavy duty ball-bearing hinges guarantee the door's durability, longevity, operation and appearance.

Clopay uses a superior quality Q-lon weatherstrip for a tight exterior seal that will last for years. A rot-resistant sill with a composite adjustable threshold fits snugly to the door bottom to protect against water and air infiltration.

Clopay fiberglass entry doors are Energy Star rated, NFRC certified, and also qualify for the Energy Tax Credit if you purchase and install one by December 31 of this year.

Cherry Rustic Entry Door Script

Clopay is the only garage door manufacturer that offers a complete line of fiberglass entry door systems to complement its popular garage door styles.

Fiberglass entry doors are a beautiful alternative to custom wood doors that typically don't hold up to the damaging effects of weather. Unlike wood, fiberglass is low-maintenance and impervious to moisture, so it won't peel, shrink, rot, warp or crack.

The polyurethane foam core provides five to six times the insulation value of a wood door, which can lower heating and cooling costs and improve the comfort of your home year round.

This Cherry woodgrain textured entry door from Clopay's Rustic Collection shown here in a factory finished Walnut stain with Trenton decorative glass and Camelot handleset definitely turns heads for all the right reasons.

It is also available as a solid door, with or without planked embossments, to complement country, English Manor and cottage style homes. Decorative wrought iron hardware like Clavos and hinge straps can be added to enhance the door's authentic, old world charm.

All Clopay fiberglass entry doors feature low-maintenance composite jambs, mull posts and brickmould. Heavy duty ball-bearing hinges guarantee the door's durability, longevity, operation and appearance.

Clopay's superior quality Q-lon weatherstrip provides a tight exterior seal that will last for years. A rot-resistant sill with a composite adjustable threshold fits snugly to the door bottom to protect against water and air infiltration.

Smooth Fiberglass Clayton Entry Door Script

Replacing your entry door delivers instant gratification on so many fronts. Not only will it improve your home's curb appeal and energy efficiency, it can almost pay for itself at resale by making a positive first impression.

Clopay is the only garage door manufacturer that offers a full line of fiberglass entry door systems to complement its popular garage door styles, like this model from Clopay's Smooth Fiberglass Collection shown here in the factory finished Desert Tan color with Clayton decorative glass. An Addison handleset completes the look.

Clopay offers a variety of appearance options and numerous decorative glass designs with complementing sidelites, transoms and hardware to choose from. Smooth fiberglass doors are also available with planked embossments.

Fiberglass is a popular entry door construction material because it is energy efficient, and impervious to moisture, so it won't peel, shrink, rot, warp or crack like wood.

Polyurethane foam core insulation provides five to six times the insulation value of a wood door, which translates into lower heating and cooling costs for you. The tempered, triple-glazed decorative insulated glass enhances that savings.

Clopay entry doors feature low-maintenance composite jambs, mull posts and brickmould. Heavy duty ball-bearing hinges are put on every door to guarantee its durability, longevity, operation and appearance.

Clopay's superior quality Q-lon weatherstrip provides a tight exterior seal that will last for years. A rot-resistant sill with a composite adjustable threshold fits snugly to the door bottom to protect against water and air infiltration.
