3-LAYER CONSTRUCTION

Model GD2SU with Ultra-Grain®
Medium Finish Paint Option
The Gallery® Collection three-layer construction provides exceptional strength, energy efficiency and dent resistance as well as a beautiful carriage house appearance. The 2" or 1-3/8" thickness of polyurethane or polystyrene insulation and thermal break makes these doors heat and cold resistant while the tongue-and-groove joint helps seal out wind, rain and snow. Available in short and long panels with multiple window options, the three-layer Gallery® Collection is virtually maintenance-free, so the first fabulous impression becomes a lasting impression.

3-LAYER CONSTRUCTION

2" or 1-3/8" thick sandwich construction consisting of exterior and interior steel skins filled with polyurethane or polystyrene insulation makes these doors strong, energy efficient and quiet.

- Hot-dipped galvanized steel interior and exterior skins with a baked-on primer and top coat help ensure a virtually maintenance-free door with long-lasting beauty.
- Nylon rollers are quiet and durable.
- Corrosion-resistant, aluminum bottom weatherseal retainer and vinyl astragal help seal out the elements.
- See your Clopay Dealer for WindCode® door availability.

Calculated door section R-value is in accordance with DASMA TDS-163.
